REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-3 are allowed.
2. The following is an examiner's statement of reasons for allowance. The prior art does not teach or suggest the claimed combination, specifically: the target throttle opening and target shift position based upon the position of the same lever, and obtaining the engine rotation number, calculating a waiting time based upon the engine rotation number, and precluding shifting until after the waiting time has passed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mukumoto ('150) is the US counterpart to a foreign reference cited in the IDS, and shows ignition timing and fuel injection control to avoid stalling. Hoshiba ('755) shows increasing engine speed before allowing a shift for the purpose of avoiding engine stall. Graham ('765) shows a typical prior art system where a lever controls both the target throttle and target shift position. Imanaka et al. ('740) shows a stall avoidance system that utilizes clutch pressures.
